*Are Your Brakes Up To Speed?*

## You've seen the news, you've heard the cause and you know the cost ... but have you tested your brakes?

Now is the time to get the brakes on your own truck, or your fleet of trucks, tested! You can easily avoid expensive downtime due to accidents or defect notices with a simple and cost effective Roller Brake Test.

*Talk to a brake specialists and  
find out how to book your fleet  
in for their brake test today!*

**Q. Why should I get my brakes tested?**

**A.** Getting your brakes tested helps reduce tyre wear, improves vehicle safety, provides auditable records and reduces brake related incidents and lowering your risk of liability.

**Q. How often should I get my brakes tested?**

**A.** By law you have to test your brakes a minimum of once per year, however, it is recommended to test more regularly to avoid costly downtime to your business.

**Q. What can happen if I don't test my brakes?**

**A.** Your drivers and the general public are at risk, and you as the owner are liable for any accidents, injuries or loss of life incurred due to brake related incidents.

Don't leave your brakes to chance, book them in to get tested today. It is quick and cost effective and, could save you a lot more in the long run.

Our industry leading technology, advanced engineering and best service in the market, means we can save you time and money while keeping your trucks moving and your customers happy.
